Request for Info - STA File # 0089-EX-ST-2005

---

Message:

Since we don't own the sites, they must be negotiated with service providers. Since we don't know yet if FCC will allow use of this band for rural LMDS service, we cannot solicit rural service providers to participate. Until we are able to negotiate with service providers in good faith that their participation has the potential of establishing a new revenue source for them, we won't be able to obtain or identify the sites.

If FCC will state unequivocally that our proposed frequency band is acceptable for rural LMDS service, then we can begin to identify specific sites for inclusion in this experimental license application. If the proposed frequency band is acceptable with restrictions, we need to know what restrictions are required.
