Subject: Request for Info - STA File #0623-EX-ST-2012

---

Message:

The StarTower tethered aerostat system is designed to support payloads of more than 200 kilograms (392 pounds) at altitudes up to 1,500 meters (0.93 miles) with no-wind and 1,800 meters (1.12 miles) wind assisted.

This information and more is included in the exhibit Application Purpose.
