Re: Global Testing Laboratories, LLC
File No. 0299-EX-ST-2007

Dear Mr. Burtle:

On June 4, 2007, the Office of Engineering and Technology ("OET") granted the above-referenced application by Global Testing Laboratories, LLC ("Applicant"), which sought an experimental license to test equipment transmitting, *inter alia*, throughout the 1647-1660 MHz band at the Applicant's facilities in Oak Ridge, Tennessee. These frequencies are downlink frequencies authorized for and operationally in use by Mobile Satellite Ventures Subsidiary LLC ("MSV"). MSV is the licensee of AMSC-1 and MSV-1, United States satellites licensed by the Commission to provide Mobile Satellite Service ("MSS") in the L band, and provides, *inter alia*, critical communications services to public safety users.

In a discussion with the Applicant, MSV has learned that the Applicant imposes restrictions on its testing, in part, to minimize the risk of interference to FCC licensees. By this letter, MSV requests that OET formally condition the Applicant's authorization on these restrictions, which are as follows:

1. except as discussed below, all testing must be conducted in a shielded enclosure;
2. the occasional testing of large items (e.g., a road paver), which can not be done in a shielded enclosure, must be conducted from a directional antenna aimed at the item under testing and must radiate at no more than 1 Watt ERP (0 dBW); and
3. the spectrum sweep in the 1600 MHz band must be less than 1 minute in duration unless the test equipment reacts, in which case the transmission may be extended briefly.

Please contact the undersigned with any questions.

Jennifer A. Manner
Vice President, Regulatory Affairs
