Re: request for confidentiality, information provided with application for Experimental License

Dear Sir:

Pursuant to FCC Rules (47 CFR 0.459(b)), we hereby request that certain information submitted with our application for an Experimental License be held confidential and protected from public disclosure. In accordance with the provisions of 0.459(b) of the Rules, we provide the following:

1. Identification of the specific information for which confidential treatment is sought:

We request confidential treatment for the information disclosed in Exhibit A and all correspondence that discloses the information in Exhibit A.

2. Identification of the Commission proceeding in which the information was submitted or a description of the circumstances giving rise to the submission:

The information was provided pursuant to GlySens's submission of Form 442 (application for Experimental License), File # 0287-EX-PL-2010.

3. Explanation of the degree to which the information is commercial or financial, or contains a trade secret or is privileged:

The information comprises trade secrets and items of a confidential commercial nature.

4. Explanation of the degree to which the information concerns a service that is subject to competition:

The information concerns technical aspects and planned evaluative activities of advanced implantable electronic medical devices under development at GlySens. The implantable medical device field is highly competitive. Advances in the field are highly dependent on development of new proprietary technologies and entail significant financial risk.

5. Explanation of how the disclosure of the information could result in substantial competitive harm:

Disclosure of the information would provide competitors with key insights regarding our product development approaches and strategic product development plans.

6. Identification of any measures taken by the submitting party to prevent unauthorized disclosure:

All GlySens employees and contractors involved in the research project as well as vendors exposed to research project confidential information are required to execute confidentiality agreements. Control and distribution of relevant printed and electronic materials is closely monitored to prevent inadvertent disclosure.

7. Identification of whether the information is available to the public and the extent of any previous disclosure of the information to third parties:

The information is not available to the public. Previous disclosures of the information to third parties have only been made pursuant to properly executed confidentiality agreements.

8. Justification of the period during which the submitting party asserts that material should not be available for public disclosure:

We request that the material be protected from public disclosure for a period of five years (this includes a three-year period following completion of the research project). This time is required to complete product development activities.

9. Any other information that the party seeking confidential treatment believes may be useful in assessing whether its request for confidentiality should be granted:

None.

Thank you for your attention to our request. Please feel free to contact me if you need any additional information.

Sincerely,

Joseph Y. Lucisano, PhD
President and CEO
