

# **GOODYEAR TIRE AND RUBBER COMPANY**

## **Video Production Events Special Temporary Authorization Application March, 2011 through August, 2012**

This STA request will facilitate the operation of the Goodyear Blimp for video production at various events in southern California and in Phoenix, Arizona. These include coverage of automobile racing, NCAA and professional, football, basketball and related widely attended and televised sporting and parade events. These require use of frequencies outside of the normal 2 GHz BAS/LTTS/CARS band which is necessary in the Los Angeles and Phoenix Markets, due to severe overcrowding of normal BAS bands.

The events will be as listed in the attached table.

All operation will be coordinated in advance, as are all radio frequency operations in and around these events, by the frequency coordinators of the Society of Broadcast Engineers in the applicable broadcast market. This application proposes the use of spectrum at 2390-2450 MHz. Operation will also be coordinated in advance with the American Radio Relay League, Inc.

Should any interference be reported, Goodyear operation will cease immediately and not resume until resolved to the satisfaction of the licensee(s) affected.

Any additional information can be obtained from counsel for the applicant:
