

GOODYEAR TIRE AND RUBBER COMPANY

New York Video Production Events Special Temporary Authorization Application June through November, 2011

This STA request will facilitate the operation of the Goodyear Blimp for video production at various events in New York State. These include coverage of baseball, horse racing and widely attended and televised tennis sporting events in California. These require use of frequencies outside of the normal 2 GHz BAS/LTTS/CARS band which is necessary in the New York market, due to severe overcrowding of normal BAS bands.

All operation will be coordinated in advance, as are all radio frequency operations in and around these events, by the frequency coordinators of the Society of Broadcast Engineers in the applicable broadcast market. This application proposes the use of spectrum at 2390-2450 MHz. Operation will be coordinated in advance with the American Radio Relay League, Inc.

Should any interference be reported, Goodyear operation will cease immediately and not resume until resolved to the satisfaction of the licensee(s) affected. Attached is a list of events with dates.

Any additional information can be obtained from counsel for the applicant:
