

GOODYEAR TIRE AND RUBBER COMPANY

Video Production Events

Special Temporary Authorization Application

January 1, 2013 through May 4, 2013

This STA request will facilitate the operation of the Goodyear Blimp for video production at a series of major sporting and other major televised events in the Western United States events. These events include the Rose Bowl events in Pasadena, California on January 1, 2013 and coverage of the Rose Bowl Parade and football game. Also listed on the attached schedule are hockey, basketball, automobile racing, and baseball games. These require use of frequencies outside of the normal 2 GHz BAS/LTTS/CARS band which is necessary in southern California and in Arizona, due to severe overcrowding of normal BAS bands.

The 2013 Rose Bowl events will occur on January 1, 2013 in Pasadena California. All operation will be coordinated in advance, as are all radio frequency operations in and around these events, by the frequency coordinators of the Southern California Frequency Coordinating Committee in the Los Angeles broadcast market and as retained by the Rose Bowl organizers. Other events will be coordinated in advance with SBE-affiliated market coordinators and any event coordinators who may be retained by the event sponsors to insure spectrum compatibility. This application proposes the use of spectrum at 2390-2450 MHz. Operation will also be coordinated in advance with the American Radio Relay League, Inc.

Should any interference be reported, Goodyear operation will cease immediately and not resume until resolved to the satisfaction of the licensee(s) affected. On site, the contact person will be Mr. Robert Peacock, Airship Operations Electronic Specialist, who can be reached by mobile phone at 330-283-4657.

Any additional information can be obtained from counsel for the applicant:
