

GOODYEAR TIRE AND RUBBER COMPANY

Video Production Events Special Temporary Authorization Application November, 2013

This STA request will facilitate the operation of the Goodyear Blimp for video production at various sporting and other newsworthy events scheduled in southern California and the vicinity. These include coverage of automobile racing, parades, and other televised sporting games in California and Arizona between November of 2013 and April of 2014. These require use of frequencies outside of the normal 2 GHz BAS/LTTS/CARS band which is necessary in the affected television markets, due to severe overcrowding of normal BAS bands.

The events will be as listed on a separate exhibit.

All operation will be coordinated in advance, as are all radio frequency operations in and around these events, by the frequency coordinators of the Society of Broadcast Engineers in the applicable broadcast market. This application proposes the use of spectrum at 2390-2450 MHz. Operation will be coordinated in advance with the American Radio Relay League, Inc.

Should any interference be reported, Goodyear operation will cease immediately and not resume until resolved to the satisfaction of the licensee(s) affected.

Any additional information can be obtained from counsel for the applicant:
