Special Conditions:

- (1) Licensee should be aware that other stations may be licensed on these frequencies and if any interference occurs, the licensee of this authorization will be subject to immediate shut down.

Special Conditions:

- (2) In lieu of frequency tolerance, the occupied bandwidth of the emission shall not extend beyond the band limits set forth above.
- (3) Prior to operation, licensee must coordinate with Part 25 stations authorized to operate in these frequency bands that are located within a within a 40 km radius of the transmitter.
- (4) Licensee shall maintain separation from the grandfathered earth stations as defined in Part 90, subpart Z, or coordinate an agreement with the grandfathered earth station licensees prior to operation in 3650-3700 MHz band.
- (5) Licensee shall ensure that the operations will not cause harmful interference to any existing registered stations in 3650-3700 MHz, and notify the registered users in the proposed areas prior to operation in 3650-3700 MHz band.
- (6) Google needs to notify participating researchers using the devices of circumstances under which interference may occur.
- (7) All of the experimental devices will be under the control of Google and they will either be retrieved by Google from the participants upon completion of the experiment or otherwise disabled upon completion of the experiment.
- (8) Google will maintain and manage a process or system that tracks the assignment of each device, its purpose of use, and will ensure that devices are recoverable from end users. Within 60 days upon completion of experiment or cancellation of license Google will recover all devices and provide a report to the FCC to this effect.
- (9) Operations are limited to frequencies below 3700 MHz.
- (10) At least 5 business days prior to operating, Google Inc. must notify licensees of earth stations operating in frequencies that overlap with the experimental operations and within 150 kilometers of the locations from which experimental operations will occur. Google Inc. must also provide such notification to the National Spectrum Managers Association frequency coordinators by email (see http://wireless.fcc.gov/services/index.htm?job=licensing_1&id=microwave). The notice must include the name and contact information of the stop buzzer personnel that will be available to cease operations in the event of reported interference. The notification should also include the testing parameters (location, antenna gain pattern, antenna height, antenna orientation, eirp density) and day and times of each test. Consult the IBFS database to identify licensed earth station in the 3625-3700 MHz band.
