

SUPPLEMENT REGARDING EMISSION DESIGNATORS

Google's existing experimental authorization for call sign W12XNS (File No. 0419-EX-CR-2018) permits testing using mid-band spectrum at specified locations. That testing is ongoing, and the authorization expires on December 1, 2021.

Consistent with Rule 5.77, Google hereby supplements File No. 0419-EX-CR-2018 to note the additional use of 5G-compatible emission designators 100MW7D and 100MF9W. No other technical details will change and Google will continue to adhere to all other technical limits under the authorization.
