Subject: Request for Info - STA File #0797-EX-ST-2012

---

Message:

Deleted frequency range of 1430-1514 MHz from EMI test requirement. Application has been updated. This frequency range was deemed not necessary due to cell phone service will be obsolete in near future (used in Japan only).

Also, was not able to get in touch with Mr. Holtmeyer. Talked with Mr. Wayne Morris (903-457-6949) of AFTRCC.
