of original correspondence: January 16, 2020

GTL Enhanced Services, LLC (the "Company") respectfully submits the following in response to your request for a more detailed description of the experiment to be conducted using the experimental Special Temporary Authority ("STA") requested under the above-referenced file number.

The Company plans to use the experimental STA to test new radio equipment in the stated frequency to determine whether such equipment will support creation of a planned indoor private network. The new radio equipment also will be tested to determine whether it can support wireless end user devices using the planned indoor private network to access voice and video applications. These tests will determine operational performance, stability, and viability of the voice and video applications using the new radio equipment.

Please contact us if you have any questions or require any additional information regarding our experimental STA request.
