

GTRAN, Inc.
12071 Tejon Street
Suite 450
Westminster, CO 80234

March 8, 2001

To whom it may concern:

GTran, Inc. is engaged in the development and manufacturer of wireless data products operating in conjunction with the cellular and PCS band networks.

GTran's program of experimentation and research is pursuant to the development of cellular and PCS products to transmit and receive data and deliver multimedia content to portable and handheld display devices such as laptops and PDA's including, but not limited to:

- PCMCIA devices
- Embedded/integrated radio devices
- Stand alone handheld devices

Development of devices will follow the standards defined in EIA/TIA IS-95-A, B, and C, and IEA/TIA-IS-2000

Research objectives sought by Gtran are the development of data devices compliant with the above standards using conductive RF testing as well as over-the-air testing coordinated with various CMRS/PCS operator/carriers.

Specifically:

- Standards compliance
- Interoperability with infrastructure
- Validation of data throughput
- Compliance with carrier requirements

GTran's program of experimentation and development will contribute to the development and expansion of domestic 3G wireless technologies by providing standards based devices for delivering high speed wireless data to consumer devices.

Sincerely,

Paul Hampton
Manager, Product Verification and Support
