

Exhibit 7

7a. The license request is not for experimental equipment rather it is for an un-classified operation of equipment designed and certified for aircraft operation. We intend to use it in a fixed location operation for the following projects.

The different equipment is all the similar in function and performance.

The program is for the evaluation and testing of interface devices we may install on customers aircraft that will use one or a combination of the devices listed in section 10.

The equipment will include but limited to fax machines, personal computers and telephone handsets.

In addition to the testing, training will be accomplished for maintenance personnel and users.

7b The equipment is to be used for interface testing and training.
