Dear Mr. Serafini:

In response to your telephone call on January 3, 2001 the purpose for the experimental license, file number 0001-EX-PL-2001, is for design and verification of our PTM 2000 Point to Multi-Point Communications broadband wireless access product. The PTM 2000 uses adaptive Time Division Duplexing (TDD) and dynamically adjustable index modulation combined to maximize spectral efficiency and throughput. The following is a depiction of the typical network:

Typical representation of PTM 2000 in a Broadband Wireless Access Network

If there are any further questions; please do not hesitate to call me at (425) 468-2241.

Sincerely,

Dean Busch
Compliance Engineer
