

EXHIBIT I – Request for Experimental Authorization

Harris Corporation ("Harris") hereby requests an FCC experimental license to perform isolation margin testing and gain adjustments for a Unit under Test ("UUT"). The testing will be performed on the rooftop Harris' located in Clifton, New Jersey to minimize unwanted reflections and represent an environment the UUT will experience in actual use. As noted on the associated FCC Form 442, this testing is being done pursuant to a governmental contract. The required information relating to this contract is as follows:

Government Agency: United States Navy Naval Research Lab ("NRL")
Contract Number: N00173-15-D-2018
Governmental Contact: Mr. Mike Monsma, (202)404-3739
Project Description: The isolation margin testing described herein is required to fulfill the existing contract

Figure 1 as shown below reflects the test set-up required to do the isolation margin test. *Appendix 1* (attached separately) details profile sketches of the Harris facility, roof top, and area of work.
