Re: Application of Harris Corporation for Temporary Spectrum Use

Dear Ms. Dortch:

The Public Safety Spectrum Trust Corporation ("PSST") hereby provides its consent to the application of Harris Corporation for an experimental special temporary authority ("Experimental STA") regarding its proposed temporary operation in the PSST's 700 MHz band spectrum to demonstrate Long Term Evolution ("LTE") equipment in Irving, Texas, between October 8, 2011 and October 14, 2011 as described in more detail below.

The PSST understands that the demonstration operation planned would conform to the following parameters:

- 1) Operation will be confined to the immediate vicinity of the Irving City Hall, 825 W. Irving Blvd, Irving, TX 75060. The equipment will include a base station and associated antennae located at the demonstration site, along-with a small number of portable units operating at no more than 1.5 kilometers from the base site.
- 2) Harris Corporation will request authority from the FCC to operate over the 758-768/788-798 MHz band. This encompasses both the 763-768/793-798 MHz bands, which are currently licensed on a nationwide basis to the PSST as part of the 700 MHz Public Safety Broadband License, and the 758-763/788-793 MHz bands known as the Upper 700 MHz D Block, which has not yet been licensed for regular operation.
- 3) Operation will occur between October 8, 2011, and October 14, 2011, allowing time during that period for setup and testing, demonstrations, and teardown.
- 4) We understand that Harris Corporation has analyzed information from the FCC's license databases and has determined that the proposed operation would not interfere or create a significant potential for interference with any public safety operations in the 700 MHz band. Harris Corporation has also told us that they found no active public safety licenses authorized to operate in the Philadelphia, Pennsylvania area on frequencies which are co-channel to those proposed in the STA request.

Given the above information, the PSST concurs with the proposed Harris Corporation operation on certain frequencies currently licensed to the PSST as part of the 700 MHz Public Safety Broadband License for purposes of demonstrating LTE equipment at Irving City Hall in Irving, Texas.

Respectfully submitted,

Chief Harlin R. McEwen
Chairman
Public Safety Spectrum Trust Corporation
