

HARRIS CORPORATION
EXPERIMENTAL SPECIAL TEMPORARY
AUTHORITY APPLICATION
FILE NO. 0900-EX-ST-2006

REQUEST FOR EXPEDITED PROCESSING

Harris Corporation (“Harris”) hereby requests that the above-captioned application be processed on an expedited basis because the proposed equipment is intended for testing and deployment to the United States troops fighting the war in Iraq. The experimental manpacks/handsets that are the subject of the application incorporate significant improvements over the tactical radios currently deployed to troops, including embedded GPS receivers to display local position and to provide automatic position reporting for situational awareness on the battlefield. Accordingly, deployment of the new radios is literally a matter of life and death to the troops in the warzone.

Expedited processing of the Harris application is therefore a matter of serious national security and will advance the declared war on terror. Failure to process the application on an expedited basis would disserve the public interest by delaying the deployment of powerful new tactical radios to troops in Iraq. For all of these reasons, Harris respectfully requests expedited processing of the application, and a decision concerning the application on or before **Friday, February 9, 2007**.
