

**HARRIS CORPORATION
EXPERIMENTAL STA APPLICATION
FILE NO. 1094-EX-ST-2013**

EXHIBIT 1 - EXTENSION OF SPECIAL TEMPORARY AUTHORITY

Harris Corporation ("Harris") hereby requests an extension of the Special Temporary Authority ("STA") previously authorized under File No. 0485-EX-ST-2013 for a six month period. An extension of the STA will facilitate continued testing and military observed on air demonstrations of a HF Wideband waveform utilizing the Harris Mdl. RF 7800-H radio operating at 24 kHz bandwidth to allow faster data transfer via HF communications. The STA extension requested herein seeks authority to increase the requested power level from to 150 Watts to 1.0 kilowatt as well.

As noted in the original STA request, any transmissions on the noted frequencies will be of short duration. Harris believes that no harmful interference to any incumbent licensees which may be operating on these frequencies will occur. However, to the extent necessary Harris will use its best efforts to avoid and minimize any potential interference. Harris further recognizes that if any interference to existing licensed stations occurs, any transmissions will be subject to immediate shut down.

Because the equipment is technically incapable of providing station identification, Harris respectfully requests a waiver of the station identification provisions of Section 5.115 of the Commission's rules, 47 C.F.R. § 5.115.

All network traffic will be simulated traffic only, solely for evaluation purposes and not for the purpose of providing network data communications services to user stations.

Harris submits that an extension of the experimental STA is necessary and in the public interest because it will 1) advance HF wideband waveform development and 2) it will advance national security efforts by providing technologically advanced radio equipment to US troops abroad.
