RE: Confirmation Number: EL13535

Dear Sir/Madam,

Harris RFCD is a developer and manufacturer of secure wireless radios. Our Radio Engineering department is interested in using this license to perform evaluation and measurement of the performance of new waveforms to send data at high rates for the development of new transceivers. On air testing is necessary to validate range and data rate predictions. The on air effort is aimed at obtaining empirical data with real channel effects inserted into the demodulated signal. Testing will occur in Western NY and the Adirondack area of NY state. We have an STA in place, which has been extended twice in order to allow testing to continue to allow the initial testing and now need to perform further testing and development.

The current STA is:

Nature of Service:	Experimental
STA call sign:	WB9XQQ
Class of Station:	XD, MO
File Number:	0183-EX-ST-2002

Sincerely,

Joe D. Burkhart
Supervisor, Field Engineering
