EXHIBIT A

Description of Transaction

By this application, Harris Corporation ("Harris") seeks Commission consent for the transfer of control of Harris Stratex Networks ("HSN") to the shareholders of Harris. HSN holds two Experimental Authorizations under FCC Call Signs WE2XVX and WE2XXZ.

The proposed transfer of HSN will be accomplished by a spin-off to the shareholders of Harris of the majority position held by Harris in HSN. Specifically, the distribution of the approximately 56 percent of the outstanding shares of HSN owned by Harris, 32.9 million shares, will take place in the form of a stock dividend payable on May 27, 2009, to Harris shareholders of record at the close of business on May 13, 2009, the record date for the spin-off dividend. Harris is publicly traded on the New York Stock Exchange and is widely held.[1] The final distribution ratio will be set on the record date by dividing the number of HSN shares to be distributed in the spin-off by the number of Harris shares outstanding at the close of business on the record date.

Approval of this application is in the public interest because the proposed transaction will permit both Harris and HSN to maximize core efficiencies and allow HSN to strengthen its position in the marketplace as an independent company.

[1] No single shareholder of record currently has more than 6.5% of its outstanding shares.
