SUBJECT: Request for temporary license to test an antenna

To the FCC,

Please accept this application including attachments for the purpose of obtaining a temporary license (one (1) month) to allow testing of a new concept antenna. It is believed that this antenna will be very beneficial to AM broadcasters. However, until actual tests are performed, the true performance of the antenna is unknown.

I am filing this application as an individual. When the tests are complete a company will be formed to manufacture and market the antenna.

Sincerely,

Robert T. Hart
