

EXHIBIT 3

This exhibit is provided in support of item 18 of FCC Form 442.

On August 28, 2000 I filed a request for experimental station authorization before the Mass Media Bureau of the FCC. Their reference number is BPEX-20000828AQC.

On March 20, 2001 The Mass Media Bureau provided a letter dismissing the application for the following reasons:

a) Did not provide sufficient detail concerning the test program and qualification of personnel.

b) Determined that the new antenna might cause interference on the chosen frequency.

c) Stated that I did not provide information detailing how the workers and general public might be protected from radiation.

The application was dismissed without prejudice.
