

FCC Form 442, Question 4: Government Project Description

Part of our research will involve outfitting Golden Eagles captured during migration at field sites in Wyoming, New Mexico, and Nevada with Platform Transmitter Terminal (PTT) units to track via ARGOS satellite's the eagle's movements over periods of 2-4 years. This work will be partly supported by funding provided by the U.S. Fish and Wildlife Service, Region 2, Office of Migratory Birds under the auspices of Grant Agreement No. 201814G929.
