Subject: Request for Info - STA File #0642-EX-ST-2012

Message:

We only need about 20 MHz somewhere between 1700-1900 MHz, so if you could select the best frequency range within 1700-1900 MHz, we will stay inside of that.

As for the 2300-2500 MHz frequency range, we will stay inside of the ISM bands of 2350-2450 MHz, so you can narrow the range to the ISM band.

Thank you,

Kent Massey
