

Addendum

Helios Remote Sensing Systems has been invited by the Rapid Reaction Technology Office (RRTO) to demonstrate its Foliage Penetration (FOPEN) Radar at the RRTO Thunderstorm Technology Demonstration 16-4 at the Naval Submarine Base in Kings Bay, Georgia during the last week of July 2016. The demonstration is sponsored by the Deputy Assistant Secretary of Defense for Emerging Capability & Prototyping.

The Helios FOPEN radar is an S-band pseudomonstatic radar with transmit gain of about 6 dBi and transmitting 2 W of power.
