RE: Experimental Authorization
Lockport, Ill.
Helixing Inc. ("Helixing")
0130-EX-PL-1999
Ref#336

Dear sir, maam:

Helixing has requested an experimental license, form 442 on March 12, 1999. I was later informed by a miss Nancy Hey, examiner, that it would take 90 days! to process my application. It will be 5, five months that I have been waiting for this license! I would like an explanation as to this continued denial of the supposed authorization I need, that your office refuses to provide! Would the FCC like to put money in my pocket or bread on my table because, theoretically I cannot test any antennas without being licensed.

You are obstructing commerce. What the heck is wrong with the way your office runs? You have cashed my check and have my money and I have nothing.
