Subject: Request for Info - File # 1137-EX-ST-2026

Message:

With respect to providing laboratory test details and results that were referenced in the STA application, (regarding interference to automotive radar sensors operating in the 76–77 GHz band), what are the instructions for submitting this information?

While we are happy to share this this information, these materials are proprietary and our preference is not to make them publicly available.

Our experts have suggested we adhere to the FCC Public Notice DA 20-361, which details instructions regarding submission of confidential materials.

Can you confirm that we need to submit the additional filing via mail, along with a password protected electronic version of the document via email, as well as a redacted version that will be made available to the general public?

How would you prefer we share this information confidentially? (i.e. separate emails with encrypted file and password? etc.)

Best regards,
Charles
