

EXHIBIT D

The authorization for WPKU683 provides that each HF transmitted packet must be identified by a digital identifier embedded in the preamble of the packet. The Commission has waived the requirement that WPKU683 transmit an FCC assigned call sign by voice or Morse telegraphy. *See Order*, DA 97-1451, at ¶ 25 (Wireless Tel. Bur. and Office of Eng'g & Tech. Jul. 10, 1997). As appropriate or necessary, HySky Communications, LLC requests a waiver of the station identification requirement set forth in Section 5.115 of the Commission's rules, 47 C.F.R. § 5.115. HySky will continue to transmit station identification by means of the preamble in its packet transmissions as set forth in the license requirements for WPKU683.
