

Request for 60 Month Experimental License

The Board of Trustees of the University of Illinois requests a 60 month Experimental License due to the continuing nature of the project under the authority of the Federal Aviation Administration Research and Development Program AAR 411, Grant A5578 DOT 05-C-AT-UIUC Center for Excellence for Airport Technology.

The Board of Trustees of the University of Illinois will accept a shorter license period if required by the Commission. However, a grant of a longer period of time would save administrative time for both the Federal Communication Commission and the Board.
