

Item # 7

This experimental license is necessary for the fulfillment of a U.S. Government contract. The contract is through the Government Agency NASA, Contract Number NA9-98100, Subcontract # G998745B17.

Infinite Global Infrastructures, LLC (IGI) is the engineering lead on NASA's Consolidated Space Operations Contract (CSOC) as a subcontractor to Lockheed Martin Space Operations in Houston, TX. CSOC is a ten-year, \$3.5 Billion contract that is focused on the modernization and sustaining of NASA's global satellite and ground communications and control center assets. As a part of IGI's Engineering and Development role, the company is called upon from time to time to experimentally verify certain satellite-based system configurations and performance characteristics. Satellites utilized range from commercial Ku-Band and Ka-Band systems, to a range of US Government owned satellite assets, including NASA's Tracking & Data Relay Satellite (TDRSS).
