

Previous FCC License was granted, call sign W2CXQZ, to Infinite Global Infrastructures, LLC (IGI). IGI was purchased by the MorganFranklin Corporation in April, 2006 and the facility moved to the DuPage Airport at 320 Kress Road in June 2006.

Previous license expired April 1, 2006 and we are now applying for a new license to also include the C-Band along with the previous Ku-Band and Ka-Band frequencies at the new location.

IDA/FAA studies were previously completed to approve the use of directional satellite antennas at this location. The Aeronautical Study, number 2006-AGL-81-NRA, "imposed no objections to the proposal." A copy of the letter dated April 25, 2006 and supporting documents can be forwarded as necessary.
