---

Message:

Inmarsat Hawaii Inc. seeks STA to test the specified terminal in Paumalu, Hawaii, at the following NAD 83 coordinates: 21°40'10.1N 158°1'59.2W. Although testing will employ a terminal capable of mobile operation, the current test plan calls for that terminal to be tested while stationary (i.e., with a negligible/0 km radius of operation). Inmarsat Hawaii Inc. requests that the Commission process this request expeditiously to permit the earliest possible start date.
