Re: Amendments to applications filed by
IntegriNautics Corp. File Nos. 0097-EX-PL-1999
0098-EX-PL-1999
0099-EX-PL-1999

Dear Carl and Doug:

After speaking with Tom Christen in the spectrum office at the Federal Aviation Administration, the Department of Transportation, and with Doug this week, IntegriNautics, Corporation is filing this amendment to its pending Experimental License applications. We are requesting that the FCC delete the GPS L-5 frequency from the application, 1176.45 MHz. The FAA has told us that they will not approve use of this frequency for experimentation, and we have determined that the experiments planned can be limited to the other two frequencies listed in the application.

If you have any questions regarding this amendment to the listed applications, please do not hesitate to call me. Thank you for your assistance.

Very truly yours,

Anne Linton
