- (8) All of the experimental devices will be under control of Intel Corp. and Intel Corp. will maintain and manage a process or system that tracks the assignment of each device, its purpose of use, and will ensure that devices are recoverable from end users. Within 60 days upon completion of experiment or cancellation of license Intel will recover all devices and provide a report to the FCC to this effect.
- (9) Intel Corp. should be aware that other stations may be licensed on these frequencies and if any interference occurs, the licensee of this authorization will be subject to immediate shut down.

Special Conditions:

- (10) Each unit will be labeled with the following legend: "For evaluation only; not FCC-approved for sale, marketing or other distribution to the general public. Operation is subject to the conditions that this product not cause harmful interference to other services and that this product accept harmful interference."
- (11) Stop buzzer point of contact to cease operation is Mr. Robert Paxman at (503) 712-8077 or robert.paxman@intel.com
- (12) Operation in 5150-5250 MHz is restricted for indoor use only.

- (14) Coordinate with the Society of Broadcast Engineers (SBE) frequency coordinator and with the Fixed Microwave licensees prior to accessing to 2402-2480 MHz and 2412-2462 MHz.
- (15) Intel Corp. must be made aware that the 5180 – 5250 MHz band is presently an Aeronautical Radionavigation band and there may be problems obtaining license for this service in the future.
- (16) If an extension of the current experiment is sought, licensee is required to file a PROGRESS REPORT after 5 months from the date of grant. This progress report shall be filed on-line through <https://apps.fcc.gov/els/AddAttachmentsEntry.do> or mailed to Federal Communications Commission; Experimental Licensing Branch, MS 1300E1; 445 12 Street, S.W.; Washington, DC 20554
