Special Conditions:

- (1) In lieu of frequency tolerance, the occupied bandwidth of the emission shall not extend beyond the band limits set forth above.
- (2) Licensee should be aware that other stations may be licensed on these frequencies and if any interference occurs, the licensee of this authorization will be subject to immediate shut down.
- (3) All of the experimental devices will be under control of Intel Corp. and they will be retrieved by Intel Corp. from the participants upon completion of the experiment.
- (4) This authorization is issued for the express purpose of conducting experimental operations described in the related application. The use of this radio station in any other manner or for any other purpose will constitute a violation of the privileges herein authorized. Except as subsequently authorized by the Commission, this radio station shall not be operated after the expiration date of the contract designated in the related application and enumerated above.
- (5) Under this authorization, at any given time the total number of experimental devices shall not exceed 1270.
- (6) Operation in 5150-5250 MHz is restricted for indoor use only.
- (7) The Intel Corporation must be made aware that the 5180 – 5250 MHz band is presently an Aeronautical Radionavigation band and there may be problems obtaining license for this service in the future.
- (8) The stop buzzer for the Intel Corporation will be Mr. Robert Paxman at 503-712-8077 or Robert.Paxman@intel.com.

Special Conditions:
