

22-February-2016

Introduction

Intel is a world leader in computing innovation. The company designs and builds the essential technologies that serve as the foundation for the world's computing devices. Intel also offers a portfolio of wireless communications solutions to connect a broad range of devices. Hardware and software products by Intel and its subsidiaries power the majority of the world's data centers, connect hundreds of millions of cellular handsets and help secure and protect computers, mobile devices and corporate and government IT systems. Intel technologies are also inside intelligent systems, such as in automobiles, automated factories and medical devices.

Testing to be Performed

Intel's research and development teams have been designing new radio technologies for the next generation broad band wireless devices. Over the air testing is required to validate the designs, characterize propagation impact, and verify overall performance.

Location:

Location: 225 meters radius centered on coordinates: 40°33'22.10"N, 74°25'44.37"W

See photo below.

Transmitter & Antenna Parameters:

Site Details					Antenna					Transmitter Emission		
Location	Station Type	Latitude (dd mm ss.ss)	Longitude (dd mm ss.ss)	AGL (m)	Type	3dB Beam Width	H-Gain (dB)	V-Gain (dB)	ERP (dB)	Frequency (MHz)	Bandwidth	Designator
Within a 225 meter radius mid-point of the 6000 Hadley Road, South Plainfield, NJ property, either indoors or outdoors.
