Request for Info - STA File # 0323-EX-ST-2002- Reply

Message:

Intel Research (in Berkeley, CA) will be running a different transmitter than the one that Wavix has at their headquarters (in Beltsville, MD). Ours will be using a roof-mounted, (omni) antenna with lower gain than that in use at the Wavix HQ.

I am anticipating Wavix will renew their current license, so I am requesting operation until 3/1/2002.

Start date of 9/15/2002 will be fine.

thanks,
- Kevin
