**Re: Intertek Testing Services, NA., Inc.
File No. 0432-EX-ST-2007**

Dear Mr. Burtle:

On August 15, 2007, Intertek Testing Services, NA., Inc. ("Applicant") filed an experimental application for special temporary authority to test equipment for compliance with European EMC standards. Applicant proposes to transmit, *inter alia*, in the 1.4-2.0 GHz band at the Applicant's facilities in Edison, New Jersey, which could potentially cause interference to L-band service link frequencies (1525-1544/1545-1559 MHz (downlink) and 1626.5-1645.5/1646.5-1660.5 MHz (uplink)) authorized for and operationally in use by Mobile Satellite Ventures Subsidiary LLC ("MSV"). MSV is the licensee of AMSC-1 and MSV-1, United States satellites licensed by the Commission to provide Mobile Satellite Service ("MSS") in the L band, and provides, *inter alia*, critical communications services to public safety users.

As a result of discussions between the parties, the Applicant stated that it did not need to use the relevant L-band frequencies. Accordingly, contingent upon the filing of an amendment to delete those frequencies, MSV does not oppose the above-referenced application.

Please contact the undersigned with any questions.
