FCC File # 0471-EX-ST-2004

---

Message:

I apologize for my delay in replying!

Yes the frequency bands that we are interested in are those you specified (80-108 MHz, 157-175 MHz, 437-483 MHz and 890-915 MHz); please amend my application to reflect this change.

If I may, an additional item was brought to my attention. Does the FCC allow another individual other than myself to perform the tests? My schedule has been shifted, and it is intended to have another individual perform the tests, if acceptable to the FCC. Please advice.

Thank you for your quick response on our application, I look forward to hearing from you.

Luis Bas
