Message:

Dear Nimesh,

Thanks again for helping review our application!

I have redrawn the map to focus on ISU properties (e.g., farms, main campus, research park, field test facilities) where we will be testing wireless equipment for our current National Science Foundation projects. Hope the revised map is fine now, but please feel free to let me know if you may have any other questions.

On a related note: Through a potential future wireless project with the National Science Foundation Platform for Advanced Wireless Research (PAWR) program (see <https://www.advancedwireless.org/>), we will be rolling out city/county scale wireless testbed, and the testbed will cover city facilities (e.g., airport). I wonder if you may help advise whether and how we may apply for similar experimental license for such city/county scale deployment?

Thanks a lot and best,

Hongwei
