Message:

- 1) The NTIA space record data form has been uploaded as an exhibit to the application.
- 2) The ITU Cost Recovery Letter is in the process of being signed at the university. We will upload it as soon as it is available.
- 3) The additional data form for API has been uploaded as an exhibit to the application.
- 4) The frequency range in the Spacecap has been changed to 436.36924 to 436.38075. The extra 10 Hz on the lower end seems necessary to avoid a fatal error detection by the validation. The revised spacecap has been uploaded as an exhibit to the application.

The API Cover Letter for the Spacecap was submitted by email as a MSWord document.
