Re: Experimental Station KA2XMI

Dear Mr. Godles:

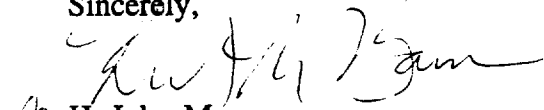

This is in regard to your letter, dated January 20, 1995, which proposed to sell limited quantities of equipment to utilities under Itron, Inc.'s experimental license, KA2XMI.

The Commission granted Itron, Inc. the authority to operate as proposed in its initial application, and any subsequent modifications of that license. Pursuant to Section 5.166 of the Commission's rules, the program of experimentation as stated by an applicant in its application for license shall be subsequently adhered to unless the licensee is authorized to do otherwise by the Commission. Therefore, to operate in any other manner, the licensee must file an application to modify its experimental license. Upon approval of this modification application by the FCC, the additional operations may be undertaken.

For your information, the Experimental Licensing Branch does not commonly grant authority to sell equipment prior to equipment authorization.

To apply for a modification of an experimental license, file an FCC Form 442. You may obtain copies of FCC forms by calling our automated form line at 1-800-418-3676. For additional information, contact the Experimental Licensing Branch at 202-418-2479 or at the address on the letterhead, mail stop 1300E1.

Sincerely,

John H. Morgan
Chief
Experimental Licensing Branch
