

Exhibit 1

This experiment is to test the ability to transmit a signal on the ground and have that signal be received and understood at a remote site.

The frequencies requested will be used to test overall system capability.

The subcontract for this experiment is with:
Scitor Corporation, Subcontract Number G1039TM-06-005

Their contract with the government is number FA8620-05-C-4070.
