Date: February 10, 2021

Subject: FCC-File.No: 0057-EX-ST-2021

Message:

Our International Bureau has reviewed the file and recommends dismissal of this application from JHU/APL because it requests authority to RECEIVE power levels at the centered frequency bands of 7140 MHz and 7147 MHz from the Morehead State University's 21m Space Tracking antenna located at Morehead, KY. We grant licenses for the transmission and not reception. Since the transmissions are from Morehead then they should apply for the transmissions to the spacecraft for these operations, rather than JHU/APL. Do you want to withdraw this application and have Morehead submit an application.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of February 10, 2021 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
