Motorola Point-to-Point Bridges – PTP 600 Series

Spectrum-Efficient, High-Availability Wireless Ethernet Bridges

The PTP 600 Series of point-to-point wireless Ethernet bridges bring together the speed and reliability of licensed wireless with the flexibility of the unlicensed space. Operating in the 5.8 and 5.4 GHz bands at Ethernet data rates up to 300 Mbps, the systems are designed for virtually any environment – non-line-of-sight, line-of-sight and high interference – where high throughput is a major requirement and/or single or dual T1/E1 capability is needed.

Through Motorola's unique combination of technologies, PTP 600 Series solutions enhance link performance in a variety of applications, including T1 replacement, Voice-over-IP, video surveillance, distance learning, telemedicine and high-speed backhaul.

The PTP 600 Series bridges are incorporated in Motorola's **MOTO**wi4™ portfolio of innovative wireless broadband solutions that create, complement and complete IP networks. Delivering IP coverage to virtually all spaces, the **MOTO**wi4 portfolio includes Fixed Broadband, WiMAX, Mesh, and Broadband over Powerline solutions for private and public networks.
