

Kenwood Communications Corporation
Experimental License Application
Narrative

The purpose of this experimental license is to conduct a product quality assurance initiative concerning the entire product line of Kenwood land mobile transceivers. The company has opened a new headquarters facility for land mobile products in the Suwannee, Georgia area and wishes to test these products prior to marketing to assure quality control. The frequency bands and operating parameters specified are relative to the entire product line of Kenwood land mobile transceivers. They will be operated both at the address specified, and as well in mobile and portable configurations in the immediate vicinity of the Kenwood facility. They will be operated for testing purposes related only to quality control, and all operation will be by Kenwood employees. •
