

Kenwood USA Corporation
STA Application
IWCE Convention Demonstration
STA File Number 0129-EX-ST-2005

This STA Application proposes the use of Television channel 14 for short-range demonstration and operation of Kenwood products within the Las Vegas Convention Center. An engineering study has been conducted, which revealed that there is no on-air television station or low power television station within 100 miles of the Las Vegas Convention Center. There will therefore be no interference to any television viewer from operation in the 470-476 MHz band.
