Re: TO WHOM IT MAY CONCERN

KLA Laboratories, Inc. STA experimental license application 1952-EX-ST-2019

This is to certify that:

KLA Laboratories, Inc. provides wireless network technology, solutions and services.

The experimentation related to the STA will be conducted in an indoor test lab and trial network setup implementing a set of test cases for our customers.

KLA Laboratories, Inc. – directly and through other companies in its group – has extensive experience in wireless network technology and implementations.

For the above reasons, I believe KLA Laboratories, Inc. meets the eligibility criteria for a Special Temporary Authority experimental license as set forth in the Commission Rules.

Regards,

KLA Laboratories, Inc.

Steve Foust
