GOVERNMENT PROJECT

The United States Marine Corps has funded Kranze Technology Solutions to develop, integrate, and maintain radio systems in a system called the Meshed Network Manager System in support of United States Marine Corps Digital Interoperability initiatives.

The Meshed Network Manager links disparate tactical digital communication systems already in use by the USMC and the Navy and generates or translates data for use by elements of the USMC in order to improve situational awareness, command and control, targeting, electronic warfare, and logistical support across the USMC's battle space.
